

TRINERGY®

Pelleted Nutrient Balancer for Performance Horses

FEATURES

- Designed for performance horses. The stresses of training and competition (strenuous exercise; high exposure to air-borne irritants, pathogens, and possibly various mycotoxins; shipping; confinement; etc.) require unique nutritional support.
- Specifically made with attributes to sustain gut health.
- Fulfills all mineral and vitamin requirements for horses in intense work.
- Supplies high levels of specific vitamins and minerals whose normal functions include:
 - antioxidant activity,
 - proper bone remodeling,
 - maintaining the integrity of muscles and lung tissue,
 - production of connective tissue (maintains tendon strength and elasticity) and
 - maximizing the immune response,
- High fat content, only from vegetable sources.
- Extremely palatable—readily consumed even when fed alone.

FEEDING INSTRUCTIONS FOR TRINERGY®

Feed 1 to 2 lb of TRINERGY® per day per horse (mature body weight around 1100 lb/500 kg). TRINERGY® can be top-dressed, mixed with grains such as oats or fed solely. Good quality forage (hay and/or pasture) should also be provided. The actual amounts required will depend on factors such as body weight, age, intensity and amount of work, season or climate and individual efficiency. The following table is offered as a guide. The actual amount of oats (grain) and forage fed should be adjusted for the individual horse.

Work Load	TRINERGY® lb/day	Oats lb/day	Hay/Pasture lb/day
Light	1	4	15
Moderate	2	8	15
Intense	2	14	10
